- alternative sizes are available on request**

System Olympia has been used for the construction of an international rowing course in Rotterdam: the “Willem-Alexander Baan”.

System Olympia is a rowing pontoon specially developed by Inter Boat Marinas and fine-tuned to be used on professional rowing courses. The pontoon has a low freeboard, high buoyancy, rounded sides and decking which is paddle friendly. The pontoon is supported by polyethylene floats and is constructed from aluminum. There are several possible decking options including; hardwood and Titan Deck (synthetic).
